Homework will be assigned approximately three times a week, and due dates will be announced in class. Assignments are due at the beginning of class, on the due date. *Late homework will not be accepted.*

Before attempting the homework problems, you are expected to read the sections carefully. I encourage you to discuss homework problems with your fellow classmates, however you are expected to write up your own solutions.

Typically, selected problems from each assignment will be graded.

Quizzes will be regularly given at the end of class Tuesdays. You will not be permitted to use the book or your notes, however calculators are allowed.

*Specific Homework Procedures*

Your name, date, and textbook section are to be written at the top of the first page.

Multiple pages must be **stapled** together. I will not be responsible for lost pages if they are not stapled together.

Each problem is to be done with all intermediate steps **neatly** written, and the problem number clearly marked. Written explanations and graphs must be included whenever appropriate.

Correct answers with no supporting work will not receive credit. Please circle your final answer.
