

S-STEM at Arizona

Douglas Ulmer

VIGRE Southwestern Network Meeting
September 27, 2008

S-STEM program overview

S-STEM program overview

- Scholarships for STEM

S-STEM program overview

- Scholarships for STEM
- DUE Program

S-STEM program overview

- Scholarships for STEM
- DUE Program
- support talented “needy” students

S-STEM program overview

- Scholarships for STEM
- DUE Program
- support talented “needy” students
 - to enter the workforce

S-STEM program overview

- Scholarships for STEM
- DUE Program
- support talented “needy” students
 - to enter the workforce
 - or go on to more STEM education

S-STEM program overview

- Scholarships for STEM
- DUE Program
- support talented “needy” students
 - to enter the workforce
 - or go on to more STEM education
- Focus on some cohort of students, improve their retention or graduation

S-STEM program overview

- Scholarships for STEM
- DUE Program
- support talented “needy” students
 - to enter the workforce
 - or go on to more STEM education
- Focus on some cohort of students, improve their retention or graduation
- Provide additional services or support

S-STEM program overview

- Scholarships for STEM
- DUE Program
- support talented “needy” students
 - to enter the workforce
 - or go on to more STEM education
- Focus on some cohort of students, improve their retention or graduation
- Provide additional services or support
- Limited to full time students, citizens and permanent residents

S-STEM program overview

- Scholarships for STEM
- DUE Program

Arizona's program

Arizona's program

- Goal is to increase success on quals and retention into second stage of PhD

Arizona's program

- Goal is to increase success on quals and retention into second stage of PhD
- Achieve this through a reduction of first-year teaching responsibilities

Arizona's program

- Goal is to increase success on quals and retention into second stage of PhD
- Achieve this through a reduction of first-year teaching responsibilities
- and by developing a new introductory “formative” TA experience

Arizona's program

- and by developing a new introductory “formative” TA experience

Arizona's program

Arizona's program

- Joint project of Math and Applied Math

Arizona's program

- Joint project of Math and Applied Math
- We award (steady state) 16 fellowships of 8K each ($=1/2$ of students support) to first or second year students

Arizona's program

- Joint project of Math and Applied Math
- We award (steady state) 16 fellowships of 8K each ($=1/2$ of students support) to first or second year students
- smallish amounts of additional money for travel (recruitment), tutoring, speakers, computer lab upgrades

Arizona's program

- Joint project of Math and Applied Math
- We award (steady state) 16 fellowships of 8K each ($=1/2$ of students support) to first or second year students
- smallish amounts of additional money for travel (recruitment), tutoring, speakers, computer lab upgrades
- (3/4 of everything in transition year)

Arizona's program

- Joint project of Math and Applied Math
- We award (steady state) 16 fellowships of 8K each ($=1/2$ of students support) to first or second year students
- smallish amounts of additional money for travel (recruitment), tutoring, speakers, computer lab upgrades
- (3/4 of everything in transition year)
- Total is 552K over 4 years, no overhead

Arizona's program
