

## COST SHEET FOR PRODUCTS AND SERVICES

### **A MAPPS Program**

- engages parents of K-12 children in the mathematics of the schools
- empowers parents with new mathematical knowledge and with new self-confidence about learning mathematics
- creates families that learn mathematics together
- improves children's competencies in mathematics
- gets the broader community embracing mathematics as something everybody can do and enjoy.

A MAPPS Program revolves around three activities for parents:

- Workshops (2 hour, stand-alone sessions on a topic in school mathematics)
- Mini-Courses (each involves a parental commitment of eight 2-hour sessions; each is based on a major theme of school mathematics)
- Leadership Development (parents become facilitators of the workshops).

Materials supporting these activities can be order through THE MAPPS Center. The Center also provides orientation and training workshops and ongoing consultation to help schools and districts (and other community-based organizations) adopt MAPPS Programs. Costs for materials and fees for services are listed on the next four pages.
