

McGraw M500A Fall 2007
Reading List

- Boaler, J. (2002). Open and closed mathematics: Student experiences and understandings. In J. Sowder, & B. Schappelle (Eds.), *Lessons learned from research* (pp. 135-42). Reston, VA: National Council of Teachers of Mathematics.
- Boaler, J., & Staples, M. (in press). Creating mathematical futures through an equitable teaching approach: The case of railside school.
- Brenner, M. E. (1998). Development of mathematical communication in problem solving groups by language minority students. *Bilingual Research Journal*, 22(2), 3&4, 149-174.
- Clement, D. H. (2003). Teaching and learning geometry. In J. Kilpatrick, W. G. Martin, & D. Schifter (Eds.), *A research companion to Principles and Standards for School Mathematics* (pp. 151-178). Reston, VA: National Council of Teachers of Mathematics.
- Driscoll, M. (1999). *Fostering algebraic thinking: A guide for teachers grades 6-10*. Portsmouth, NH: Heinemann.
- Henningsen, M., & Stein, M. K. (2002). Supporting students' high-level thinking, reasoning, and communication in mathematics. In J. Sowder, & B. Schappelle (Eds.), *Lessons learned from research* (pp. 27-35). Reston, VA: National Council of Teachers of Mathematics.
- Khisty, L. L. & Chval, K. B. (2002). Pedagogic discourse and equity in mathematics: When teachers' talk matters. *Mathematics Education Research Journal*, 14(3), 154-168.
- Langrall, C. W., & Swafford, J. (2000). Three balloons for two dollars: Developing proportional reasoning. *Mathematics teaching in the middle school*, 6(4), 254-261.
- Linchevski, L., & Kutscher, B. (2002). Tell me with whom you're learning, and I'll tell you how much you've learned: Mixed-ability versus same-ability grouping in mathematics. In J. Sowder, & B. Schappelle (Eds.), *Lessons learned from research* (pp. 47-61). Reston, VA: National Council of Teachers of Mathematics.
- Ma, L. (1999). *Knowing and teaching elementary mathematics: Teachers' understanding of fundamental mathematics in China and the United States*. Mahwah, NJ: Lawrence Erlbaum.
- Middleton, J. A., & Spanias, P. A. (2002). Findings from research on motivation in mathematics education: What matters in coming to value mathematics. In J. Sowder, & B. Schappelle (Eds.), *Lessons learned from research* (pp. 9-15). Reston, VA: National Council of Teachers of Mathematics.
- Moschkovich, J. (2007). Bilingual mathematics learners: How views of language, bilingual learners, and mathematical communication affect instruction. In N. Nasir & P. Cobb (Eds.), *Improving Access to Mathematics: Diversity and Equity in the Classroom* (pp. 89-104). New York: Teachers College Press.

Moss, J., & Case, R. (2002). Developing children's understanding of the rational numbers: A new model and an experimental curriculum. In J. Sowder, & B. Schappelle (Eds.), *Lessons learned from research* (pp. 143-150). Reston, VA: National Council of Teachers of Mathematics.

National Research Council. (2001). *Adding it up: Helping children learn mathematics*. J. Kilpatrick, J. Swafford, and B. Findell (Eds.). Mathematics Learning Study Committee, Center for Education, Division of Behavioral and Social Sciences and Education. Washington, DC: National Academy Press.

Pesek, D. D., & Kirshner, D. (2002). Interference of instrumental instruction in subsequent relational learning. In J. Sowder, & B. Schappelle (Eds.), *Lessons learned from research* (pp. 101-107). Reston, VA: National Council of Teachers of Mathematics.

Smith, E. (2003). Stasis and change: Integrating patterns, functions, and algebra throughout the k-12 curriculum. In J. Kilpatrick, W. G. Martin, & D. Schifter (Eds.), *A research companion to Principles and Standards for School Mathematics* (pp. 136-150). Reston, VA: National Council of Teachers of Mathematics.

Smith, M. S., & Stein, M. K. (1998). Selecting and creating mathematical tasks: From research to practice. *Mathematics Teaching in the Middle School*, 3(5), 344-350.

Stein, M. K., & Smith, M. S. (1998). Mathematical tasks as a framework for reflection: From research to practice. *Mathematics Teaching in the Middle School*, 3(4), 268-275.

Stein, M. K., Grover, B. W., & Henningsen, M. (1996). Building student capacity for mathematical thinking and reasoning: An analysis of mathematical tasks used in reform classrooms. *American Education Research Journal*, 33, 455-488.

Stevenson, H. W., & Stigler, J. W. (1992). *The learning gap: Why our schools are failing and what we can learn from Japanese and Chinese education*. New York: Simon & Schuster.

Stigler, J. W., & Hiebert, J. (1999). *The teaching gap: Best ideas from the world's teachers for improving education in the classroom*. New York: The Free Press.

Swafford, J. O., & Langrall, C. W. (2002). Grade 6 students' preinstructional use of equations to describe and represent problem situations. In J. Sowder, & B. Schappelle (Eds.), *Lessons learned from research* (pp. 197-201). Reston, VA: National Council of Teachers of Mathematics

Usiskin, Z. (1998). Paper-and-pencil algorithms in a calculator-and-computer age. In L. J. Morrow, & M. J. Kenney (Eds.), *The teaching and learning of algorithms in school mathematics* (pp. 7-20). Reston, VA: National Council of Teachers of Mathematics.
