

Math 124 and 125 Homework

Every question that appears under the Exercise heading in each section is important. Taking the time to answer these questions quickly can help you master the material and help make the later problems easier. Also, the only way to develop the algebraic skills you will need in this course and in later courses is through practice. The Exercise portions of certain sections (marked with *) and of all the chapter reviews present your main opportunity to develop these essential skills.
