You explain things very thoroughly, excellent method! Your enthusiasm is a great addition for a math class. You are truly a stellar math instructor. I have NO complaints! ☑️
I believe Bryden was an excellent teacher. He was always in a good mood and when people were a little slow to respond (Mondays) he livened things up. Bryden was very clear and understandable and if he wasn't we could have him explain further. I find myself lucky to have had Bryden as an instructor.
Bryden was a great instructor. He always came to class enthusiastic & prepared & seemed to really care that we all understood the material. He explains concepts very well, so that it doesn't seem challenging to learn. He also believes in every single one of his students!
Bryden was a wonderful GS1. I would highly recommend him as a teacher... he understood the material and could teach it to us. He was also concerned about what we learned the material... it was great!
Bryden Cais was a great instructor who cared for his students knowledge. He explained things clearly.
Instruction was excellent! If there is something upon which he could improve, I'm oblivious to it.
Bryden was an excellent teacher, (although my grade may not reflect that.) He was kind and very intelligent. I just wish I had take advantage of his willingness to help me learn.
I liked the teaching in this class a lot. Bryden never went ahead if someone didn't understand... great!!
The pace of the class was faster than I would have liked but it left time for review. You did a good job teaching but I think you would do better teaching an honors math course.
It was nice to come to class and find a teacher who was passionate about the subject. Your willingness to make sure everyone understands the topic is nice. Sometimes though, the homework, going over it, took long because of the lack of people doing it. But overall I enjoyed the class.
Great instructor, explained things very well. No bad comments.
Bryden helped me a lot, if I was struggling with a concept, he was always willing to meet in OH or in an appointment. I appreciated his positive reinforcement, enthusiasm/love for math and availability to his students.
Bryden cared a great deal about his students
Bryden made every possible effort to ensure the learning environment and opportunities were available. His instructions were clear and never too difficult to understand.
Bryden did an excellent job with this class. He bend over backward to make sure that we understood, and went out of his way to help the class and individuals.
Our instructor did a great job.
